

[Palisade Decision Tools 5.7 Crack Download](#)

The screenshot displays the Palisade Decision Tools 5.7 interface. The main window shows a spreadsheet titled "Portfolio Analysis 1 - Basic @RISK Model.xlsx" with columns for "Known inputs", "Uncertain inputs", and "Outputs". The "Outputs" section shows a "Portfolio return" of 8.03%. A histogram titled "@RISK - Output: C15" displays the distribution of portfolio returns, with a normal curve overlaid. The histogram shows a mean of 9.78%, a mode of 7.05%, and a standard deviation of 11.59%. A statistics panel on the right provides detailed data for the "Portfolio return" cell, including minimum, maximum, mean, mode, median, standard deviation, skewness, kurtosis, and values at various percentiles. A simulation progress window in the bottom left shows the simulation is 43% complete, with 216,000 iterations out of 500,000. A text box explains that the results are from one simulation run and that multiple runs will produce different results.
